

# Lenard Healthcare

Bring ultrasound back to practice

# About Lenard Healthcare

Lenard Healthcare founded on Jan 2016 by a team of expert engineers with over 85 years of combined experience in developing new technologies to repair ultrasound systems and transducers.

Today Lenard Healthcare is dedicated to repair ultrasound transducers and machines from Sonosite and GE at one third of manufacturer cost and manufacturing Elzhen 2200 Smart Transducer Analyzer.

At Lenard we are excited to continuously announce new technologies and new services offering to our valuable customers.

# Products & Services

## Services:

- Fujifilm Sonosite Probe Repair Service
- Fujifilm Sonosite Ultrasound Repair Service
- GE Healthcare Probe Repair Service
- Ultrasounds and Transducers Evaluation

## Products:

- Refurbished & New Fujifilm Sonosite and Samsung Transducers
- Refurbished Fujifilm Sonosite Ultrasounds Systems and Parts
- Refurbished GE Transducers
- Elzhen 2200 Smart Transducer Analyzer
- Elzhen 2200 Plus Smart Transducer Analyzer
- Ariana Ultrasound Reflector

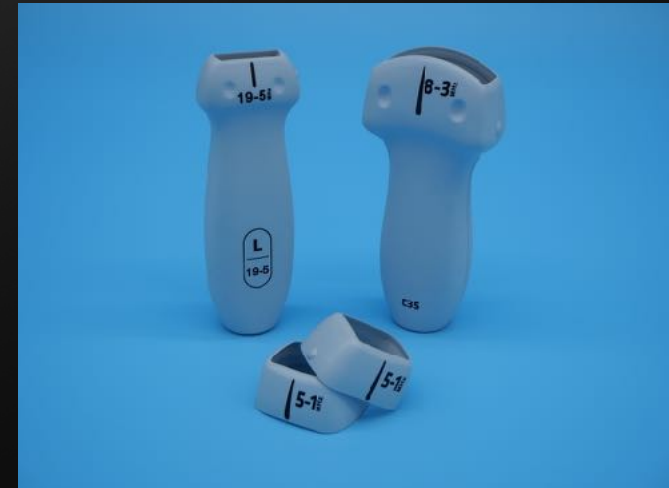

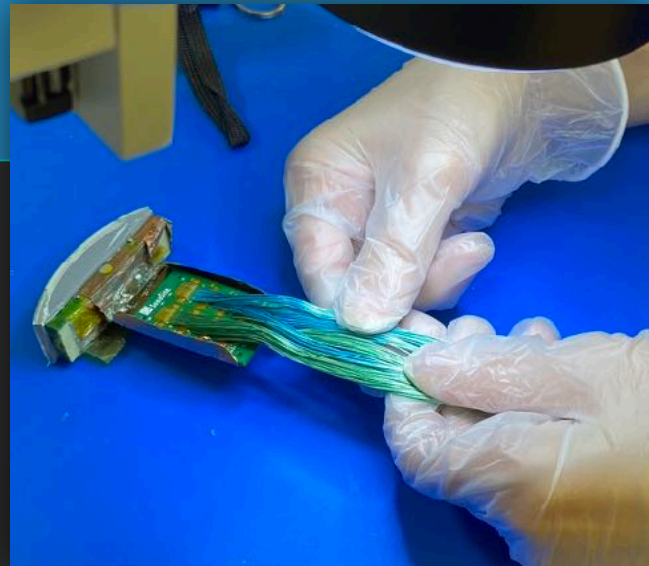

# Products & Services

Lenard is dedicated to repair Sonosite and GE ultrasound machines to the component level. Our staff of engineers are well trained and experienced to repair portable ultrasounds, transducers and accessories. With a variety of spare parts from ICs, SMD components, FPGAs, control panels, LCDs, power supplies, mini-docks, memory modules, upgrade patches and batteries we are fully capable to address most of repairs.

# Products & Services

Sonosite ultrasounds are among the most popular portable machines available on the market but these expensive, easy to use and friendly machines are very sensitive and of course “Repairable”. If your machine displays any of Blue/Black error screens, it doesn’t mean you need a new one or you have to sell it for a few hundred dollars. Contact us today to find out how quick we can repair yours for less than one-third the cost of a replacement.

# Products & Services

## Repair Program Options

**Straight Forward Program:** We will evaluate your system, probes and send evaluation reports including final estimate in 48 hours. Systems will be returned in 3-5 days and probes within 2 days. A variety of loaners from ultrasounds to transducers are available.

**SWAP Program:** With a variety of refurbished ultrasounds and probes, we can swap your probes or systems with a full refurbished device at repair cost.

All systems and probes repairs come with 1 year warranty and 14 days return policy and no restocking fees.

# Products & Services

## Ultrasound Paint Lab

Lenard Healthcare is all about outstanding ultrasound probes, systems and quality. Using a technique and system perfected over years, along with the right number of experts, means you get the refurbishing quality you expect backed by a one-year warranty.

# Elzhen™ 2200

We proudly Introduce Elzhen™ 2200 Smart Transducer Analyzer  
After 7 Years of tireless efforts of 14 Members of our crew

## Key Points :

- Supporting Transducers up to 2,400 elements
- Integrated Artificial Intelligent (AI) algorithm to recognize faulty probes
- Dead, Weak and Good elements finder
- Embedded software, Free of any Controller PCs
- Element ZIF pin finder
- Bipolar Pulser
- Intuitive User Interface
- Portable System
- Free Life Time Transducer Packages Upgrade
- Transducer adapters available for GE™, Philips™, Samsung™, Sonosite™, Toshiba™, Siemens™, Esaote™ and more
- Powered by Analog Switches Technology

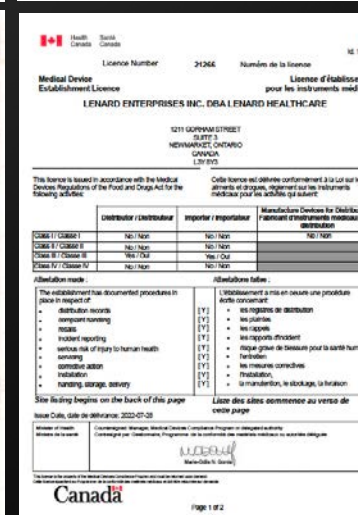

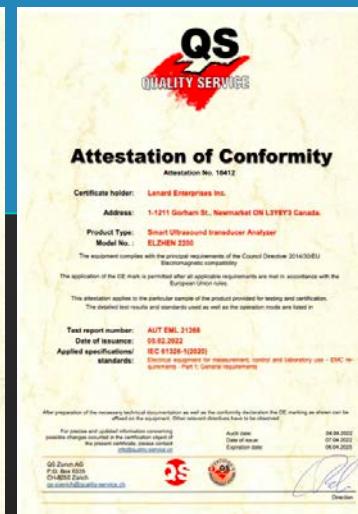

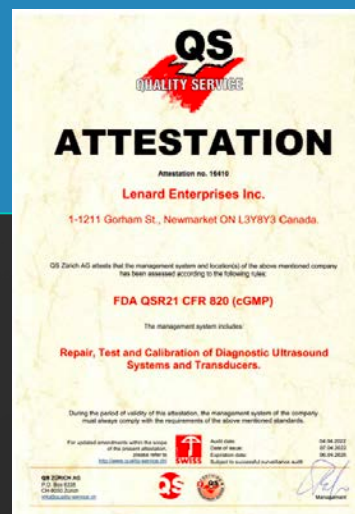

# Certificates

## Lenard Healthcare Certificates:

- FDA QSR21 CFR 820 (cGMP) (Repair, Test and Calibrate of Diagnostic Ultrasound Systems and Transducers)
- ISO 10004:2018 (Quality Management-Customer Satisfaction)
- ISO22059:2020 (Guidelines on consumer warranties/guarantees)
- Health Canada (Licence No. 21266)

## Elzhen 2200 Smart Transducer Analyzer Certificates:

- IEC61010-1(2017)
- IEC61326-1:2020
- IEC61326-1(2020)
